

PCCA VersaBase[®] Cream

Patent-Pending Technology

An Ideal Base for All Topical Preparations

PCCA # 30-3641

Soothing and gentle, even for the most sensitive areas.

VersaBase Cream is an elegant, yet durable, topical cream. It simulates the natural moisturizing barrier of the skin through its emulsion system and rubs in quickly, leaving a soft and silky feel.

This base can be used for a variety of pharmaceutical and cosmetic applications, and is **an ideal compounding base for topical and vaginal preparations, including hormone replacement therapy**. A wide array of active ingredients can be incorporated into the base, including those used in topical, vaginal and dermatological formulations.

BENEFITS

- Noncomedogenic
- Hypoallergenic
- Nonirritating
- Odor-free
- Natural emulsifiers
- Long-lasting moisturizing effect
- Stable over a broad pH range (3.5 to 12)
- Nonionic emulsion system, compatible with cationic and anionic substances
- No incidence of "pilling" when applied to the skin

RELATED SPECIALTIES

- Hormone Replacement
- Corticosteroids
- Vaginal
- Sunscreens
- Antibiotics
- Anti-Aging
- Antifungals
- Anesthetics

FORMULATED WITHOUT

- Oils
- Parabens
- Propylene glycol
- Petrolatum

THE VERSABASE FAMILY

We have developed of an entire line of topical bases, expanding your options for compounded medications to address a variety of patients' needs.

- **VersaBase Cream** (PCCA #30-3641): An ideal compounding base for topical and vaginal preparations, including HRT.
- **VersaBase Gel** (PCCA #30-3656): A compounding base for topical and vaginal preparations, including HRT. Mixes well with MucoLox[™] for an excellent vaginal formulation option.
