

Want to save time compounding capsules?

Benefits of LoxOral®

Saves time

Allows powders to fall faster and more easily into the capsules.

Improved dissolution

Enhances the release of many types of APIs, potentially improving absorption.

Even distribution

Well-defined, uniform particle size creates improved distribution of APIs.

Optimal stability

Low hygroscopicity resists moisture and promotes stability even for sensitive APIs.

Estimated Capsules Compounded per Day

600

Time Spent Compounding 600 Capsules*

Microcrystalline Cellulose

vs.

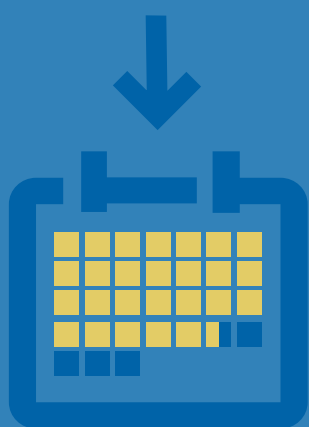

LoxOral

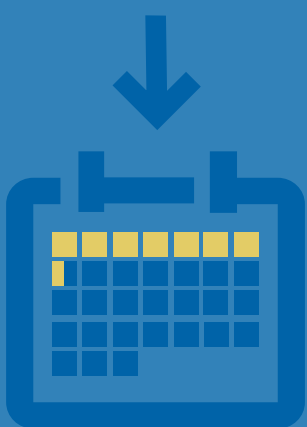

50:48 minute average for every 600 capsules.

16:30 minute average for every 600 capsules.

26.5-day average per year spent compounding 600 capsules each day.

8.5-day average per year spent compounding 600 capsules each day.

Time Savings Annually

Save nearly **18 days** a year when compounding 600 capsules each day with LoxOral.

What will you do with your extra time?

Start getting more done with LoxOral.

* Calculations based on time compounding 100 capsules using excipient only (no APIs) in a Jaansun 100 capsule machine.
